

# VALV-TROL BALANCED 2-WAY/3-POSITION VALVES FOR THROTTLING SERVICE

## FOR WATER, H.W.C.F., OIL OR OTHER LIQUIDS

35 PSI air recommended on diaphragm

The **Valv-Trol 3-Position 2-way Valve** (Throttle Type) is basically our standard Balanced 2-Way Valve (Bulletin A-5) with a double diaphragm top assembly. The lower diaphragm, which is actuated by applying air to port "A", will stroke the valve completely. This operation is the same as a standard 2-way valve.

The upper diaphragm is actuated by applying air to port "B". This will stroke the valve anywhere from 10% to 90% of full stroke depending on the setting of the nuts on the adjusting stem.

With this valve, you have a choice of full flow, restricted flow, or no flow. The selection depends on which diaphragm is actuated. This feature is often used to slow the ram on a hydraulic press just before the press closes completely or when it starts to open.

**A** The intermediate position is determined by the setting of the adjusting nuts on top of the valve.

**Renewable trim made of hardened stainless steel.**

Proven to be very resistant to the effects of corrosion, wear, and wire drawing for longer service life.

Can be field converted from Normally Open (NO) to Normally Closed (NC) or vice versa.

Model	Port Size	Max. PSI*	Cv	Construction *		
				Body	Replaceable Trim	Seals
D-1010-T	3/4"	3500	4.2	Bronze	Hardened S.S.	Buna N
D-1011-T	1"	3500	12.0	Bronze	Hardened S.S.	Buna N
D-1012-T	1-1/4"	3500	13.0	Bronze	Hardened S.S.	Buna N
D-1013-T	1-1/2"	3500	19.9	Bronze	Hardened S.S.	Buna N
D-1014-T	2"	3500	24.0	Bronze	Hardened S.S.	Buna N
D-1015-T	3"	3500	58.0	Bronze	Hardened S.S.	Buna N

\*Consult factory for special requirements.

When ordering, specify if valve is to be assembled normally open (N.O.) or normally closed (N.C.). Double diaphragm assembly may also be added to some 4" valves.

### The Valv-Trol Advantage

Many parts of Valv-Trol Valves are interchangeable between the same size 2-way, 3-way, and check valves. This helps you to reduce your spare parts inventory and allows us to maintain a more complete inventory for emergency availability and shorter lead times.

Our valves are all subjected to 100% pressure testing to ensure a drop tight seal before we ship to our customers.
